

# NEXT GEN FORENSIC INVESTIGATION

- ✓ Remote Forensic Investigation
- ✓ Incident Response Triage & Remediation
- ✓ Fast, Scalable and Easy-to-install

For firms involved with ***acquisition due diligence, risk underwriting, corporate security, legal/HR and other forensic needs***, there is a new remote service delivery option that combines affordability and ease of use with superior enterprise-wide forensic visibility and unmatched speed.

*It is now remarkably easy to eliminate technical and logistical hurdles and just “CyFIR it.”*

CyFIR’s debut in the AWS Marketplace brings a new level of accessibility, visibility and affordability to “one off” and recurring digital investigations for private equity, law firms, underwriters, MSSPs and other professionals supporting the middle market. CyFIR’s hourly, remote-deployment model allows you to rapidly spin up individual, suitably-sized CyFIR servers tailored to that specific need. With the ability to purchase this remote forensic analysis platform by the hour, service providers avoid large up-front costs for additional software licenses and minimize or eliminate the need for “boots on the ground.”

While traditional tools may be difficult to set up and deploy, CyFIR and AWS solve this problem by handling the packaging and deployment of the CyFIR servers, ensuring that service providers receive a “clean and ready” stack each time they begin an engagement. This ease of deployment allows firms to not only take on larger jobs but also multiple jobs simultaneously, without requiring on-site support. Following are links to additional information, and please register for the introductory workshop [CyFIR for the Forensics Investigator](#)

- ✓ [Forensic tools don’t have to break the bank](#)
- ✓ [Are your tool’s limitations getting in the way?](#)
- ✓ [Need a hassle-free remote forensics tool? Click here!](#)
- ✓ [Your clients have been breached. Now what?](#)
- ✓ [Ditch the limitations of outdated forensic tools](#)

**Expand your clientele with ease!**

Try CyFIR on the AWS Marketplace or register to join our workshop  
“[CyFIR for the Forensics Investigator](#)” on Tuesday, December 10th at 11:00am ET.
